

For Immediate Release

Melcor Developments Ltd., (TSX:MRD) Reports Strong Second Quarter Results

Melcor Developments Ltd., an Alberta-based real estate development Company, reported net earnings of \$10,138,000 or \$0.33 per share (basic) on revenue of \$66,017,000 for the six months ended June 30, 2010 compared to net earnings of \$3,929,000 or \$0.13 per share (basic) on revenue of \$43,362,000 for the same period in 2009.

Earnings for the three months ending June 30, 2010 were \$5,501,000 or \$0.18 per share (basic) on revenue of \$35,770,000 compared to earnings of \$3,746,000 or \$0.12 per share (basic) on revenue of \$27,279,000 during the same period in 2009.

Earnings are up for the quarter and year to date compared to 2009 due to improved real estate markets primarily in the Community Development Division. The Division experienced an increase in revenue of 82% over the same period in the prior year and an increase in profit margins which are returning to the long term historical levels for the division. The increase in revenue is due to an increase in housing demand, as confidence in the housing market has improved, combined with affordable interest rates. During the quarter, the Community Development Division purchased 3 land parcels comprising 24 acres net of joint venture interest in Edmonton, Alberta, 25 acres in Northwest Calgary, Alberta and 80 acres in the Phoenix area of Arizona, USA. The 25 acres in Calgary are part of the formation of a new joint venture that brings the company's holdings in that investment to 75 acres in West Edmonton with the view of finalizing the formation of a new joint venture with a third party. In addition, the Company approved the purchase of 360 acres (216 acres net of joint venture interest) in Cochrane, Alberta, which should generate revenue in 2011.

The Company's retail commercial and office portfolio continues to grow in size and profitability even with some downward pressure on occupancy and rental rates. In June, the Investment Property Division closed on the purchase of a 240 residential complex comprising 11.5 acres in metro Houston, Texas. The purchase price, including closing costs, was US\$20,632,000 and the mortgage assumption was US\$16,167,000. The property is expected to contribute to earnings for 2010.

Subsequent to the quarter, the Company refinanced and funded one of its larger office buildings for \$29,000,000 (\$20,520,000 net of previous mortgage payout) for a fixed term of 5 years at 4.77% and negotiated a 10 year fixed rate loan at 4.91% for \$8,200,000 (\$4,100,000 net of joint venture interest) with funding set for early August 2010, on a revenue property in Chestermere, Alberta.

The Company believes that the Alberta residential real estate markets have now stabilized and expects to see cautious growth continuing for the foreseeable future. While commercial real estate is going through a rebalancing, primarily in the office market, it is not expected to have a significant negative impact to the operations of the division. The Company remains confident that it has the appropriate assets, capital resources and experienced management team to continue to create value for the shareholders during the current real estate business cycle.

CONSOLIDATED STATEMENT OF CASH FLOWS

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. BASIS OF PRESENTATION

The accompanying unaudited interim financial statements, except as explained in Note 5, have been prepared by the Company, following the same accounting policies and methods as those disclosed in the audited financial statements for the year ended December 31, 2009. Certain information and note disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in Canada have been omitted. These interim financial statements should be read in conjunction with the December 31, 2009 audited financial statements and the notes thereto. In the opinion of management, all adjustments, which are of a normal and recurring nature, necessary for a fair presentation of the balance sheet, results of operations, and cash flows of these interim periods, have been included.

Earnings will fluctuate from one quarter to another due to the timing of plan registrations and the cyclical nature of the real estate markets.

2. SHARE CAPITAL

Issued and outstanding common shares at June 30, 2010 are 30,339,230 (December 31, 2009 – 30,283,730). There were 52,500 options exercised during the current quarter (6,000 during the second quarter in 2009), for a total of 55,500 year to date (6,000 year to date in the prior year).

(\$000s)	June 30, 2010	December 31, 2009
	(Unaudited)	(Audited)
Undeveloped land and carrying costs	267,936	245,409
Pre development costs	56,160	54,701
Developed land inventory cost	106,296	113,557
	430,392	413,667

3. LAND INVENTORY

During the three months ended June 30, 2010, the Company purchased 129 acres of land (348 year to date) at a cost of \$9,727,000 (\$19,836,000 year to date) and received vendor financing of \$5,343,000 (\$13,914,000 year to date). During the same period in the prior year, the Company did not purchase any land.

Land inventory expensed to cost of sales during the quarter was \$13,817,000 (\$26,107,000 year to date). This compares to the same period in 2009 where \$10,333,000 was expensed to cost of sales (\$14,228,000 year to date).

4. **FINANCIAL GUARANTEES**

In the normal course of operations, the Company issues letters of credit as security for the completion of obligations pursuant to development agreements signed with municipalities. At June 30, 2010 the Company had \$30,086,000 (December 31, 2009 - \$30,437,000) in letters of credit outstanding. A substantial portion of the costs for which the letters of credit have been provided as security, have been recorded in the provision for land development costs in respect of these development agreements.

Normally, obligations, along with letters of credit securing such obligations, diminish as the developments proceed, through a series of staged reductions over a period of years (average of three to four) and are ultimately extinguished when the municipality has issued final completion certificates.

The Company enters into joint venture agreements and, in doing so, may take on risk beyond its proportionate interest in the joint venture. These situations generally arise where preferred financing terms can be arranged on the condition that the strength of the Company's covenant will backstop that of the other joint venture participant(s) who also provide similar guarantees. The Company will have to perform on its guarantee only if a joint venture participant was in default of their guarantee. At June 30, 2010 the Company had guaranteed \$2,773,000 (December 31, 2009 - \$6,268,000) in loans and \$5,941,000 (December 31, 2009 - \$6,597,000) in letters of credit in support of other participant's interests. The loan guarantees include those which are ongoing, as they relate to the relevant lines of credit, and those which have staged reductions as they relate to the financing of specific assets or projects such as infrastructure loans, short-term land loans or mortgages.

To mitigate the possibility of financial loss, Melcor is diligent in its selection of joint venture participants. As well, Melcor has various remedies available to it within the joint venture agreement.

5. CHANGES IN ACCOUNTING POLICIES

Effective January 1, 2010 the Company adopted CICA Handbook Section 1582 - *Business Combinations*, which applies prospectively for business combinations for which the acquisition date is on or after January 1, 2010. The standard requires use of the acquisition method which results in, among other things, all assets and obligations of an acquired business recorded at fair value at acquisition, and all transaction costs associated with the acquisition recorded as expenses as incurred.

As a result of the adoption of Section 1582, the Company also adopted CICA Handbook Sections 1601 - *Consolidations* and 1602 - *Non-Controlling Interests* effective January 1, 2010. All three sections must be adopted concurrently. Section 1601 establishes standards for the preparation of consolidated financial statements. Section 1602 establishes standards for accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. The adoption of Sections 1601 and 1602 did not impact the Company's financial statements.

6. SEGMENTED INFORMATION

A summary of the Company's wholly owned subsidiary, with operations in the United States, are as follows:

	For the six months ended		For the three	e months ended	
(\$000s)	June 30, 2010	June 30, 2009	June 30, 2010	June 30, 2009	
External revenue	477	8	355	-	
Gain/(Loss)	12	(217)	19	(192)	
Interest Income	-	-	-	-	
Interest Expense	84	-	84	-	
Assets	31,317	8,679	31,317	8,679	
Equity	8,140	8,656	8,140	8,656	

On June 1, 2010, the Company acquired a 240 unit residential complex near Houston, Texas, which has been accounted for using the acquisition method. The acquisition resulted in an increase to investment properties of \$21,965,000 (US\$ 20,632,000) and was financed with the assumption of a mortgage in the amount of \$17,211,000 (US\$ 16,167,000), with the remainder being a cash outlay to the Company.

The amounts of revenue and net income of the acquiree since the acquisition date included in the consolidated statement of comprehensive income for the reporting period are \$222,000 and \$14,000 respectively.

The Company is unable to present pro forma revenue and earnings as though the acquisition date had been January 1, 2010, as the information necessary to determine these amounts is not available to the Company.

MELCOR DEVELOPMENTS LTD.

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A") JULY 29, 2010

The following discussion and analysis of the interim operating results and financial position of Melcor Developments Ltd. as at June 30, 2010 should be read in conjunction with the unaudited interim financial statements for the six months ended June 30, 2010 and the audited financial statements and notes to those statements for the years ended December 31, 2009 and 2008 and the 2009 annual MD&A. Certain statements in this discussion can be considered forward looking, and readers are cautioned that such statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those contained in these forward looking statements. These risks and uncertainties are described elsewhere in this discussion and in other regulatory filings.

The balance sheet is presented without reference to current assets or current liabilities. The operating cycle of an entity involved in real estate investment and development is normally considered to be longer than one year. Thus, the concept of current assets and current liabilities is not considered relevant and there is no need to segregate the balance sheet to disclose assets or liabilities which are expected to be settled within the immediately following year.

Revenues in the second quarter of 2010 showed a significant increase over the comparable period in 2009. Edmonton as a region has continued to see the strongest sales in the current year as compared with other regions. Sales volumes and margins are in line with management's expectations in all regions.

Inventory levels remain satisfactory in comparison to this time last year when excess inventory was one of the Division's major concerns. The Division has ended all discount programs and is working to re-establish higher margins to be more consistent with historical averages. The Division has plans in place for the creation of new lot inventory in areas of high demand.

Development has commenced in northwest Calgary in the Valley Ridge area of the city. The project has been met with much enthusiasm and marks the Company's first development within the city of Calgary since 2002. The Division expects to sell a significant portion of these lots in the second half of the current year, pending plan registrations.

Shareholders are reminded that earnings can fluctuate significantly from one year to another due to the timing of plan registrations, the cyclical nature of real estate markets, the mix of lot sizes and product types, and the mix of joint venture sales activity.

During the quarter, the division purchased 3 parcels of land comprising 24 acres (net of joint venture interest) in Edmonton, Alberta, 25 acres in northwest Calgary, Alberta and 80 acres in the Phoenix area of Arizona, USA.

The 25 acres in Calgary are part of the formation of a new joint venture that brings the company's holdings in that investment to 75 acres (net of joint venture interests). The Division anticipates that development of these lands could begin as early as 2011.

Subsequent to the quarter, the division conditionally purchased 155 acres in west Edmonton with the view of finalizing the formation of a new joint venture with a third party. In addition, the Company approved the purchase of 360 acres (216 acres net of joint venture interest) in Cochrane, Alberta which should generate revenue in 2011.

The Company continues to investigate real estate property acquisitions throughout Alberta, Saskatchewan, British Columbia and in the United States.

B. PROPERTY DEVELOPMENT OPERATIONS

A 6,000 sq. ft. Commercial Rental Unit ("CRU") building was transferred to the Investment Properties Division during the current quarter at a transfer price of \$2,950,000 for an intersegment gain of \$1,055,000 to the Division. This transfer marks the completion of Leduc Common Phase 1.

Leduc Common

Active interest remains for this site. The Division plans to commence construction of an additional CRU building in Leduc Common Phase 3. The remaining development of Leduc Common will be completed within the next five years.

Miller Commercial

Construction of two CRU buildings commenced in the current quarter with anticipated available space for tenant possession next year. The addition of the two CRU buildings will complete this 3.3 acre development located in Edmonton's northeast.

Westgrove Common

This development, located in Spruce Grove, continues to grow. The construction of a bank site is completed with transfer to Investment Properties to occur in the third quarter. Future development of 23,000 sq. ft. of retail space will complete the current phase. Additional commercial sites adjacent to the Westgrove Common could be developed in 2 to 5 years.

Chestermere Station

Activity in Chestermere Station remains strong. During the second quarter, the Division commenced construction on two of three proposed separate buildings, totaling just over 10,000 sq. ft. of retail space once all three have been completed. The Division also has a development permit to construct a 53,000 sq. ft. professional building. Construction is pending leasing activity.

Kingsview Market

The Division has initiated construction at the Kingsview Market, a 38 acre development in Airdrie. Phase one will include the construction of three buildings totaling approximately 40,000 sq. ft. Leasing interest has been very strong.

Other Projects

Currently the division is engaged in obtaining planning approvals, design and pre-leasing of a number of projects in multiple regions including Red Deer, Airdrie, Lethbridge, Calgary, and South Edmonton and West Edmonton.

C. INVESTMENT PROPERTY OPERATIONS

		Six Months	Three Months		
	endeo	d June 30th	ended June 30th		
Operating Review (\$000)	2010	2009	2010	2009	
Rental revenue	21,817	18,631	11,157	9,303	
Operating expenses	(8,864)	(8,039)	(4,622)	(3,907)

Amortization of investment	(2,328)	(1,960)	(1,329)	(998)	
properties					
Amortization of tenant leasing costs	(1,615)	(1,160)	(936)	(592)	
Administrative expenses	(448)	(386)	(241)	(179)	
Earnings from operations	4,099	3,449	1,758	1,835	
Gain on sale of investment property	-	339	-	-	
Divisional earnings	4,099	3,788	1,758	1,835	

The Investment Property Division recorded earnings from operations of \$4,099,000 during the first six months of 2010 compared to \$3,449,000 during the same period in 2009. Net operating income (NOI) as a percentage of revenue for the year to date (59.4%) is up in comparison to the same period in 2009 (56.9%).

Comparison of same asset NOI from portfolio assets held during both periods year to date is \$11,384,000 for the first six months of 2010 which compares to \$10,538,000 during the same period in 2009 - an increase of 8.0% or \$846,000. Comparison of same asset NOI from portfolio assets held during the same quarter is \$5,749,000 for the second quarter of 2010 which compares to \$5,301,000 during the second quarter 2009 - an increase of 8.5% or \$448,000. NOI growth from portfolio assets is expected to continue to increase over the next few years as the portfolio continues to have existing leases which are expected to renew at higher rates.

Rental rates have remained stable during the second quarter of 2010. Occupancy is at 91% as at June 30, 2010, consistent with the prior quarter.

During the quarter, the Division acquired a 6,000 sq. ft. CRU building in Leduc Common, transferred from the Property Development Division (as described in section B – "Property Development Operations").

On June 1, 2010 the Division closed on the purchase of a 240 unit residential complex comprising 11.5 acres near Houston, Texas, at a purchase price (including acquisition costs) of \$US 20,632,000, and assumed a \$US 16,167,000 mortgage. The Division continues to pursue other opportunities in the United States.

D. RECREATIONAL PROPERTY OPERATIONS

	Six Months ended June 30th		Three Months ended June 30th	
Operating Review (\$000)	2010	2009	2010	2009

Gain on sale of assets	7	19	7	19
Divisional earnings (loss)	(268)	(409)	444	228

This Division owns and manages three 18-hole championship golf courses, two that are in the Edmonton region (one of which is 60% owned), and one in the Black Mountain region of Kelowna, British Columbia. In addition, the Division owns a 50% interest in another golf course in south west Edmonton.

The Kelowna golf course was fully operational throughout the second quarter, leading to increased revenues as compared to this time last year, given that the course only opened to the public in June 2009.

LIQUIDITY AND CAPITAL RESOURCES

The US sub-prime lending debacle, that sent global financial markets into a crisis, continues to impact liquidity for many enterprises. The Company's liquidity has been affected in several ways, both negatively and positively. Real estate, by its nature, is more liquid in good markets and less liquid in poor markets. In the current real estate market, our real estate is clearly less liquid in the short term, but current economics still support the fundamental value of the Company's real estate assets.

The Company uses two sources of funding to finance operations depending on the division:

- The Community Development Division uses a bank line of credit which margins the land development assets of the Company. These credit lines are used to fund the operations of the Company. Due to recent reductions in the prime borrowing rates, this Division has benefited by being able to borrow at rates fluctuating with prime. Even with an increase in the spread over prime, the cost of borrowing on a floating basis is currently lower compared to historical cost of funds. We had experienced some borrowing pressure as the repayment terms for certain of our agreements receivable were extended, which negatively impacted our margining ability. Our builders were able to move their inventory and our overdue agreements receivable are at normal levels. We continue to work with our main lender to modify the terms of our credit facility to better reflect our borrowing requirements.
- The Investment Property Division uses fixed rate, long term mortgage financing on its revenue producing assets to raise capital. Financing terms had tightened in 2009 as many lenders curtailed lending activity. This was compounded by the loss of the asset backed lending market. The tightening of terms included the reduction of loan amortization (from 25 years to 20 years), lower loan to value ratios (from 75% to 60%), tighter restrictions on debt coverage, increased pricing of loans as premium spreads have increased (from 125 basis points to 330 basis points) and a movement away from non-recourse loans. The effect to the Company has not been significant, given that the market value of the investment property assets have risen as a result of increased rental revenues. As such, the Company is still able to finance increased loan amounts from its existing portfolio of buildings. The Company continues to see a greater appetite from traditional lenders to lend with terms that continue to be more competitive with each passing month. Also, more and more lenders who left the mortgage market a year ago are now back lending money, adding to the number of choices available to borrowers. In

those situations where the Company provides a limited recourse on the loan, amortizations are back to 25 years, spreads are in the 170 – 210 basis point range over the benchmark Canada bond yield and loan to value ratios have risen to 65-70% range with some as high as 75%.

OFF-BALANCE SHEET ARRANGEMENTS CRITICAL ACCOUNTING ESTIMATES FINANCIAL INSTRUMENTS RECENT ACCOUNTING PRONOUNCEMENTS ISSUED BUT NOT YET ADOPTED

There are no material changes to the above titled sections at June 30, 2010 in comparison to the December 31, 2009 annual MD&A.

DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROLS OVER FINANCIAL REPORTING

The President and Chief Executive Officer and the Vice President, Finance and Chief Financial Officer have evaluated whether there were material changes to internal control over financial reporting during the quarter ended June 30, 2010 that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting. No such changes were identified.

CHANGE IN ACCOUNTING POLICY

International Financial Reporting Standards

In February 2008, the AcSB confirmed that IFRS will be mandatory in Canada for profitoriented publicly accountable entities for fiscal periods beginning on or after January 1, 2011. Our first annual IFRS financial statements will be for the year ending December 31, 2011 and will include the comparative period of 2010. Starting in the first quarter of 2011, we will provide unaudited consolidated interim financial information in accordance with IFRS including comparative figures for 2010.

The Company commenced its IFRS conversion project in 2008. A formal project plan and a project team, including an external advisor, have been established. Regular reporting is provided to senior management, the Audit Committee and the Board of Directors. The conversion plan consists of the following phases:

Diagnostic phase – This phase includes a high-level impact assessment of the differences between current Canadian GAAP and IFRS, focusing on the areas which will have the most significant impact to the Company. A preliminary conversion roadmap has been prepared as part of this phase.

Design, planning and solution phase – This phase focuses on determining the specific impact on the Company based on the application of the IFRS requirements. Accounting policies will be finalized, first-time adoption exemptions will be considered, draft financial statements and disclosures will be prepared and a detailed implementation plan and timeline will be developed. This phase also includes the development of a training plan.

Implementation and review phase – This phase includes execution of changes to accounting policies and practices, and implementation and testing of business processes, systems and internal controls. It also includes training programs for the company finance and other staff, as necessary.

The Company completed the diagnostic assessment phase in 2008 by performing comparisons of the differences between Canadian GAAP and IFRS. This assessment provided insight on the high risk and complex areas relating to the conversion. The Company determined that the most significant impact of IFRS conversion is to Investment Properties, the effects of which are elaborated on below.

The Company is now nearing the end of the design, planning and implementation phase. The Company's preliminary IFRS policies and procedures are in the process of being finalized. While new procedures and controls are being put into place to address certain unique IFRS accounting and disclosure requirements, the Company does not anticipate any significant comprehensive changes to its current accounting and consolidation systems, its internal controls or its disclosure control process as a result of the conversion to IFRS. Appropriate resources have been secured to complete the changeover on a timely basis. We have detailed project plans and progress reporting in place to support and communicate the changeover.

The following paragraphs describe the material changes between the Company's current Canadian GAAP accounting policies, and the anticipated accounting policy choices under IFRS. Certain accounting policies expected to be adopted under IFRS may not be adopted and the application of such policies to certain transactions or circumstances may be modified and, as a result, the impact of the conversion has not been quantified at this time.

IFRS 1: First-Time Adoption of IFRS

The company's adoption of IFRS will require the application of IFRS 1, *First-time Adoption of International Financial Reporting Standards* ("IFRS1"), which provides guidance for an entity's initial adoption of IFRS. IFRS 1 generally requires that an entity apply all IFRS effective at the end of its first IFRS reporting period retrospectively. However, IFRS 1 does require certain mandatory exceptions and permits limited optional exemptions. The following are the optional exemptions available under IFRS 1 which are significant to the Company and which the Company expects to be applied in preparation of its first financial statements under IFRS:

a) Business combinations

IFRS 1 states that a first-time adopter may elect not to apply IFRS 3, *Business Combination* retrospectively to business combinations that occurred before the date of transition to IFRS. The Company intends to make this election in order to only apply IFRS 3 to business combinations prospectively (i.e. to those that occur on or after January 1, 2010).

b) Cumulative translation differences

International Accounting Standards ("IAS") 21, *The Effects of Changes in Foreign Exchange Rates*, requires an entity to determine the translation differences in accordance with IFRS from the date on which a subsidiary was formed or acquired. IFRS allows cumulative translation differences for all foreign operations to be deemed zero at the date of transition to IFRS, with future gains or losses on subsequent disposal of any foreign operations to exclude translation differences arising from periods prior to the date of transition to IFRS. The Company expects to deem all cumulative translation differences to be zero on transition to IFRS.

c) Borrowing costs

IAS 23, *Borrowing Costs*, requires an entity to capitalize the borrowing costs related to all qualifying assets. IFRS1 allows an entity to apply the requirements related to borrowing costs to qualifying assets for which the commencement date for capitalization is on or after its transition date or an earlier designated date. The Company elected to apply IAS 23 prospectively from its transition date (i.e. January 1, 2010).

d) Share-based payment transactions

On first time adoption of IFRS the requirements of IFRS 2, *Share-based Payment*, apply to all grants of equity settled transactions made after November 7, 2002 that have not yet vested at the transition date. A company may also choose to apply to any equity instruments that were granted before November 7, 2002, or that were granted after that date, and vested before the date of transition, but only if the company has previously disclosed the fair value of the instrument, determined at the measurement date. The Company has elected to apply IFRS 2 to all share-based payments that had not yet vested at the transition date

IFRS 1 allows for certain other optional exemptions; however, the company does not expect such exemptions to be significant to its adoption of IFRS.

Investment properties

The Company considers its commercial properties, properties under development and manufactured home community to be investment properties under IAS 40, *Investment Property* ("IAS 40"). Investment properties include land and buildings held primarily to earn rental income or for capital appreciation or both, rather than for use in the production or supply of goods or for sale in the ordinary course of business. The Company notes that its golf course assets are not considered investment properties under IAS 40 and as such, will be accounted for as property, plant, and equipment. Similar to Canadian GAAP, investment properties are initially recorded at cost under IAS 40. However, subsequent to initial recognition, IFRS requires that an entity choose either the cost or fair value model to account for its investment properties. The company expects to use the fair value model when preparing its financial statements under IFRS. This will have a material impact on the Company's balance sheet given that the majority of the Company's investment properties have a fair value significantly higher than their current amortized cost.

The adoption of the fair value model will also have a significant impact on the Company's income statement. Under the fair value model, gains or losses arising from a change in the fair value of investment properties are to be recognized in income in the period of the change. Net income during any given period may be greater or less than as determined under Canadian GAAP depending on whether an increase or decrease in fair value occurs during the period of measurement. Under the fair value model, depreciation of investment properties is not recorded.

Other areas of change

The conversion to IFRS will also have an impact on the Company's accounting for certain other areas such as borrowing costs, provisions, interests in joint ventures and tenant leasing costs.

All changes as described above will impact the accounting of deferred income taxes, most significantly related to the changes in the carrying values of the Company's investment properties.

Several IFRS standards are in the process of being amended by the IASB. Amendments to existing standards are expected to continue until the transition date of January 1, 2011. The Company is monitoring the IASB's active projects and all changes to IFRS will be incorporated as required.

At the current stage of the project, Melcor cannot reasonably determine the full impact that adopting IFRS would have on its financial position and future results.

SUMMARY OF QUARTERLY RESULTS

Financial information for the prior eight fiscal quarters are as follows:

	(\$000s)	(\$000s)	Earnings Per Cor	ommon Share
	Revenues	Net Earnings	Basic	Diluted
June 30, 2008	19,779	3,702	.12	.12
September 30, 2008	25,967	18,542	.59	.58
December 30, 2008	41,758	14,404	.47	.47
March 31, 2009	16,083	183	.01	.01
June 30, 2009	27,279	3,746	.12	.12
September 30, 2009	44,374	9,377	.32	.31
December 31, 2009	48,872	9,918	.33	.33
March 31, 2010	30,247	4,637	.15	.15
June 30, 2010	35,770	5,501	.18	.18
