DESCRIPTION OF THE BUSINESS

General Information

Melcor is a real estate development and asset management company that traces its history back to 1923. We have operated and prospered for over 95 years due to stable and committed ownership and loyal and dedicated staff who are focused on the real estate industry. Melcor trades on the Toronto Stock Exchange under the symbol “MRD.”

Our main operations are in Alberta, specifically in the metropolitan areas of Calgary, Edmonton, Grande Prairie, Lethbridge and Red Deer. We also hold and operate assets across Western Canada (British Columbia and Saskatchewan) and the United States (Arizona and Colorado). We have five primary business segments: Community Development, Property Development, Melcor REIT, Investment Properties and Recreational Properties.

The following information applies in general to each of Melcor’s segments. Where individual segment characteristics differ, those differences are noted under the segment descriptions below.

Products and Services

We believe that we have the necessary capabilities to execute our strategic initiatives and achieve the performance targets set out in our business plan. Our management team is focused on ensuring a disciplined approach and hands-on management of our projects, assets, and capital.

Our depth of experience in the real estate industry provides a competitive advantage. Our business model is focused on sustainable returns over the long-term.

Specialized Skill and Knowledge

Melcor employs management and administrative personnel to manage our business. We use third-party contractors to carry out development and construction activities (such as planning, design, engineering, architecture, utilities servicing).

We also contract property management services for some assets in our Investment Properties and Melcor REIT divisions and we employed approximately 205 seasonal staff in our Recreational Properties division over the golf season.

Competitive Conditions

The real estate development and management industry is highly competitive, with a large number of well-financed companies operating in the same markets as Melcor. Our operations and assets are concentrated in and around major population and employment centers. We develop long-term relationships with the municipalities, construction industry, financial institutions and the people who live in these communities.

Our competitive position is shaped by our:

- Financial strength and proven track record
- Solid asset base, including raw land holdings
- Experienced personnel

The majority of our assets are located in Alberta, where oil and gas activity is a significant economic driver. While our direct reliance on oil and gas is minimal, our business is reliant on overall market conditions and consumer confidence.

Melcor has a strong financial position, enabling us to take advantage of purchase opportunities that a softer real estate market may provide.

Financing

Melcor maintains strong relationships with its major lenders. Our capital structure and liquidity allow continued access to financing in spite of fluctuations to credit markets and the economic environment.

Melcor uses fixed rate, long-term mortgages on its revenue producing assets to raise capital for acquisitions, development activities, and other business expenditures. As such, most of Melcor’s borrowings are in the form of long-term financings secured by specific assets.

Operations are supplemented by a syndicated operating line of credit with Canadian chartered banks, which margins Melcor’s land development assets (raw land inventory, land under development and agreements receivable). We also use fixed rate, long-term mortgage financing on our revenue producing assets to raise capital for acquisitions, development activities, and other business expenditures. As such, most of our borrowings are in the form of long-term, property specific financings such as mortgages or project financings secured by specific assets. Melcor also has project specific financings

on residential community and commercial development projects.

Environmental Protection

Melcor's development activities are subject to laws and regulations concerning the protection of the environment. For example, environmental laws or local bylaws may apply to a development site based on its environmental condition, present and former uses, and its adjoining properties. Environmental laws and conditions may result in delays, cause Melcor to incur significant compliance and other costs, and can severely restrict or prevent development in environmentally sensitive regions or areas. We employ a rigorous due diligence process prior to acquiring raw land, development sites or investment properties to mitigate our exposure to these potential issues.

Environmental protection requirements did not have a significant financial or operational effect on our capital expenditures, earnings or competitive position during 2019 and we do not expect significant effects in future years.

For more information on our Environmental, Social Responsibility and Governance (ESG) practices, please refer to the ESG section in our 2019 annual MD&A, incorporated by reference.

Employees

Melcor had 144 employees at December 31, 2019 and employed 205 seasonal employees in the summer months, primarily in the Recreational Properties division.

Total full-time permanent was down by 2% compared to December 31, 2018. The following table shows the distribution of staff on that date.

COMMUNITY DEVELOPMENT

Community Development acquires raw land and plans, services and markets urban communities. The majority of residential lots and parcels are sold to homebuilders that purchase sites through agreements for sale. The Community Development division also plans, services and markets large-scale commercial and industrial centres. In 2019, this segment accounted for 43% of consolidated revenue (2018 – 54%).

The following table summarizes Melcor's raw land inventory (at Melcor ownership percentage) by region at December 31, 2019. Total raw land inventory was 10,632 acres.

Seasonality

The Community Development division is seasonal by nature. The cyclical nature of real estate markets, the mix of land sold, and the mix of joint arrangement sales activity can cause period-to-period fluctuations in results.

The division is also subject to the seasonality of the construction industry. Revenue is recognized when plans are registered, which tends to happen in the fourth quarter when development activity slows down and builders gain possession of lots.

For additional information regarding the Community Development division, see Melcor's 2019 management's discussion and analysis incorporated by reference in this AIF and filed on www.sedar.com.

PROPERTY DEVELOPMENT

Property Development acquires prime serviced commercial sites from the Community Development division to develop and lease high-quality retail, office and industrial revenue-producing properties that deliver asset appreciation gains and/or stable long-term returns. In 2019, this segment accounted for 15% of pre-consolidated revenue (2018 - 10%).

Once completed and substantially leased, these assets are transferred to the Investment Properties division where they are held and managed. The Property Development division has developed over 2 million sf of office, retail and industrial space, with a further 96,797 square feet under current development. Participants in commercial projects include companies such as ATB, BMO, Canadian Tire, Canadian Western Bank, Cara, CIBC, Home Depot, Loblaws, McDonald's, Rona, Royal Bank, Save-On-Foods, Scotiabank, Shoppers Drug Mart, Staples, Starbucks, Subway, TD Bank, Tim Hortons, Wal-Mart, Winners and more.

Golf Course	Ownership	Location

Lewis Estates Golf Course	60%	Edmonton, AB
Jagare Ridge Golf Club¹	50%	Edmonton, AB

Competitive Conditions

The number of golf courses in the Edmonton region has grown substantially over the past 25 years, leading to pressure to remain competitively priced and offer a great golf experience. In spite of challenging competitive conditions and unpredictable weather conditions over the golf season, Melcor's golf courses remain profitable.

Our competitive advantage is that our golf courses are optimized to balance consistent playing conditions and player experience while paying close attention to the bottom line.

Seasonality

This division is significantly impacted by weather conditions. Revenue is highly dependent on the number of golf rounds that can be sold throughout the golf season and maintenance and operations costs can be impacted by precipitation and weather patterns throughout the whole year as well as severe weather events.

For additional information regarding the Recreational Properties division, see Melcor's 2019 management's discussion and analysis, incorporated by reference in this AIF and filed on www.sedar.com.
